

CONNECTING PUBLIC SECTOR INTERNAL AUDITORS THROUGH SOCIAL MEDIA

ADB internal audit embraces social media to introduce a new initiative for public sector internal auditors. AuditWithoutWalls! is an online community for public sector internal auditors to ask questions, share knowledge, and learn ideas anytime, anywhere.

AUDITWITHOUTWALLS!

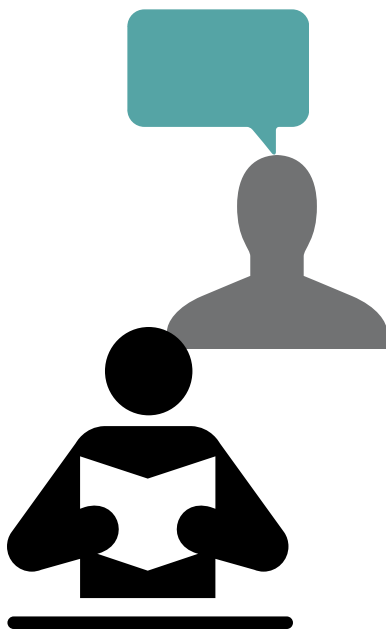

AUDIT
without
Walls!

When you are stuck on an audit, or wish to learn a new topic, where do you go for help? If there is an online community available anytime, anywhere, would you consider using it?

That's AuditWithoutWalls! for you.

SHARE AND LEARN

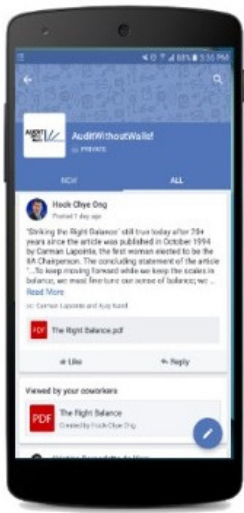

* It is going to transform the way internal auditors support each other.

* It is built on a social media platform, for internal auditors to ask questions, share knowledge, and learn ideas anytime, anywhere. You will not be limited to location and time.

* There are no walls. Just an alternative way for internal auditors to share and learn. And, it's **FREE!**

A PRIVATE SPACE

It is set up as a private space, which is a "safe" and "gentle" introduction to social networking, even for internal auditors not familiar with social media.

WI-FI + YAMMER

All you need is a Wi-Fi connection. The social media app we are using for the community is **Yammer**. Yammer is a communication tool for team collaboration.

CONNECT

You can connect to AuditWithoutWalls! from android, iPhone, tablet, laptop, and desktop.
